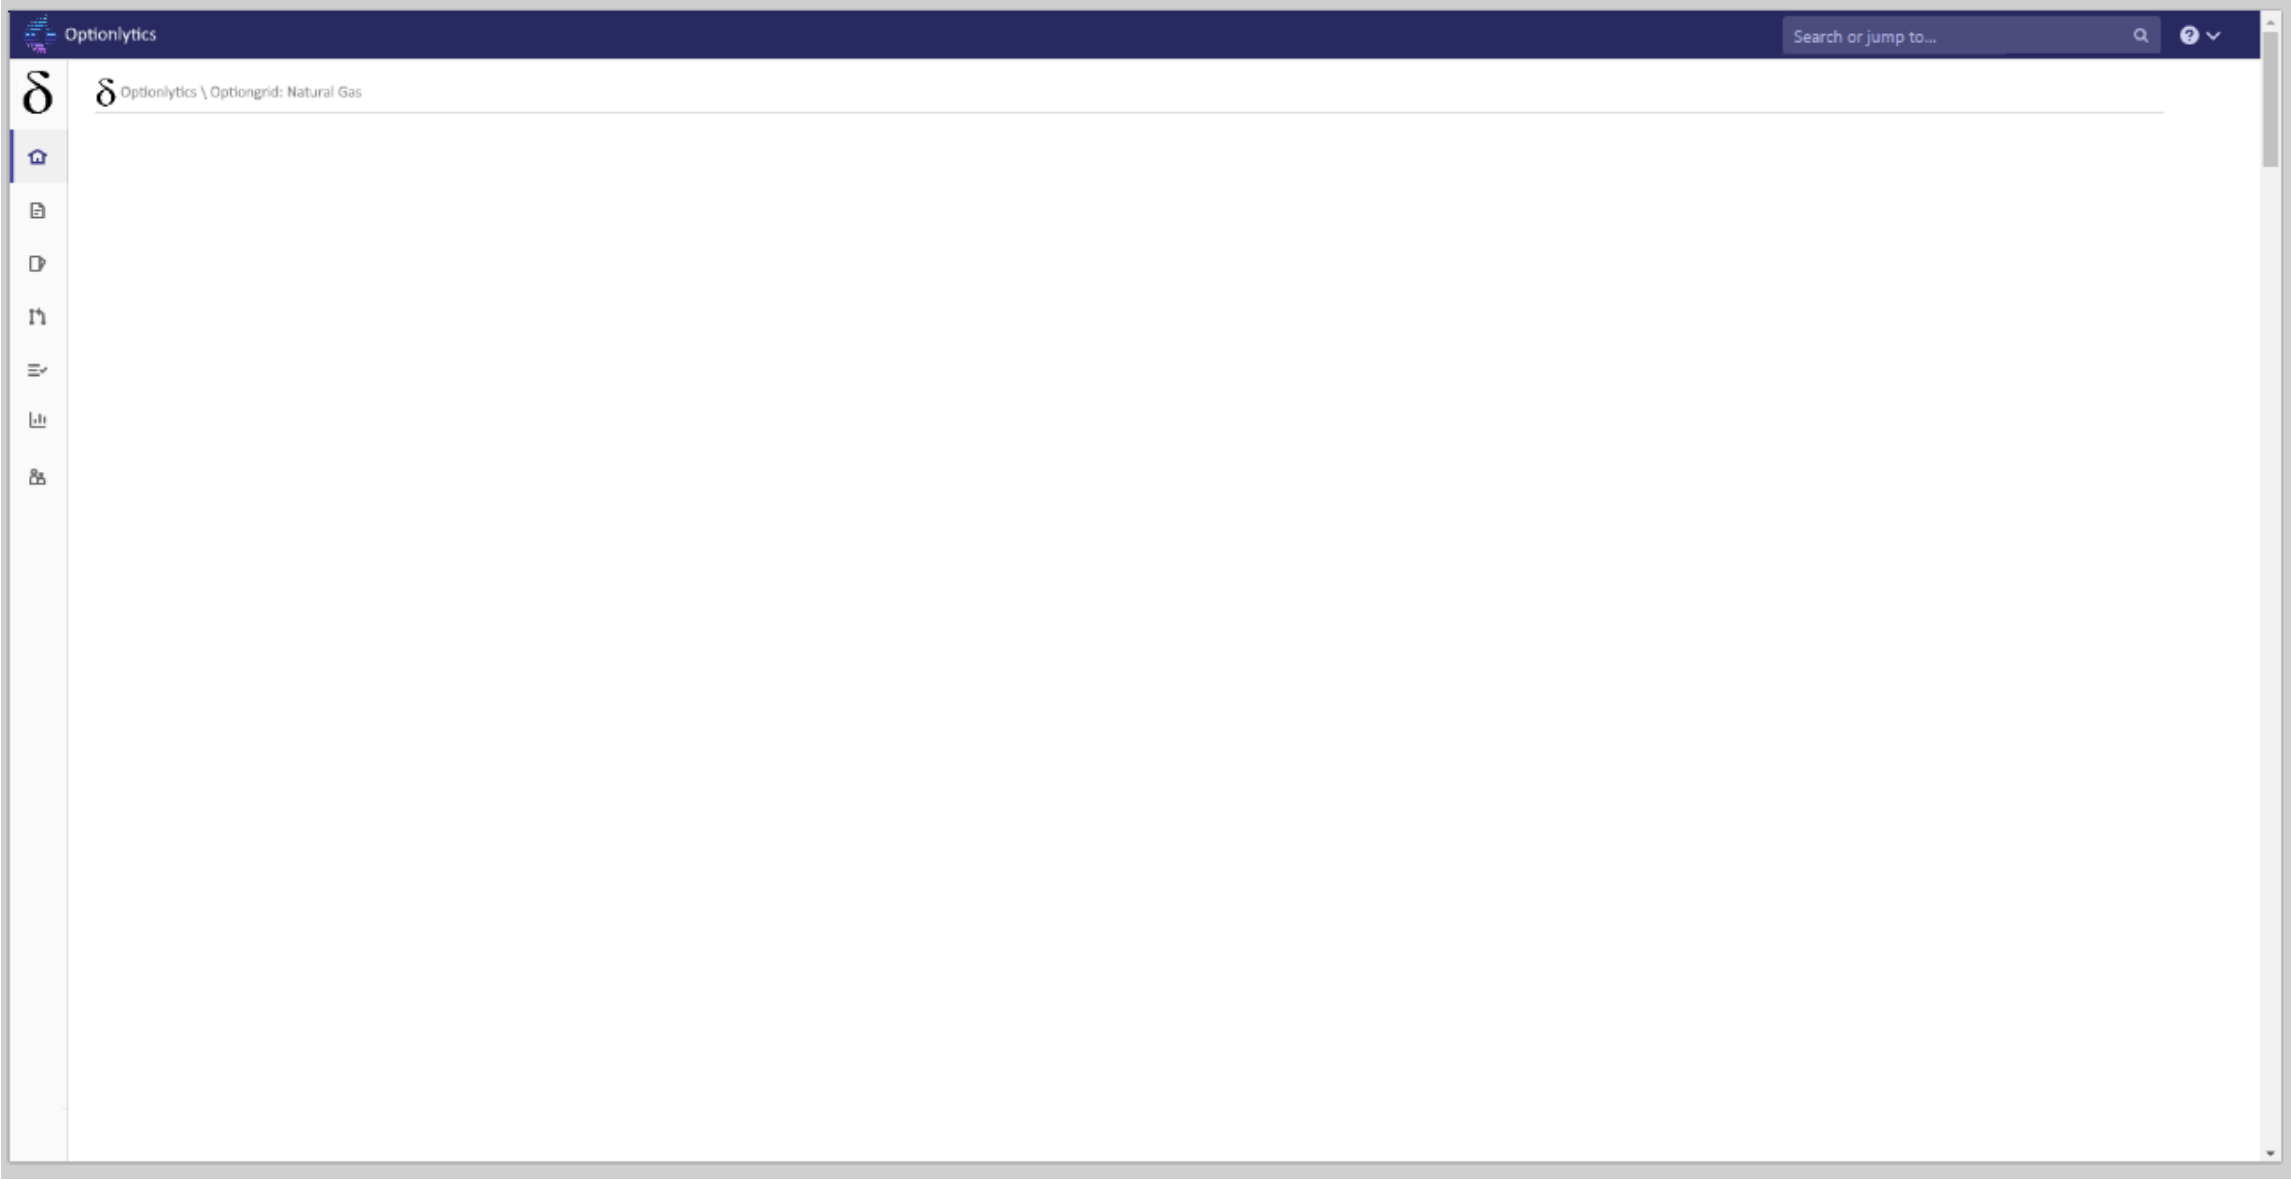
Optionlytics

# Development Document

Interface Design

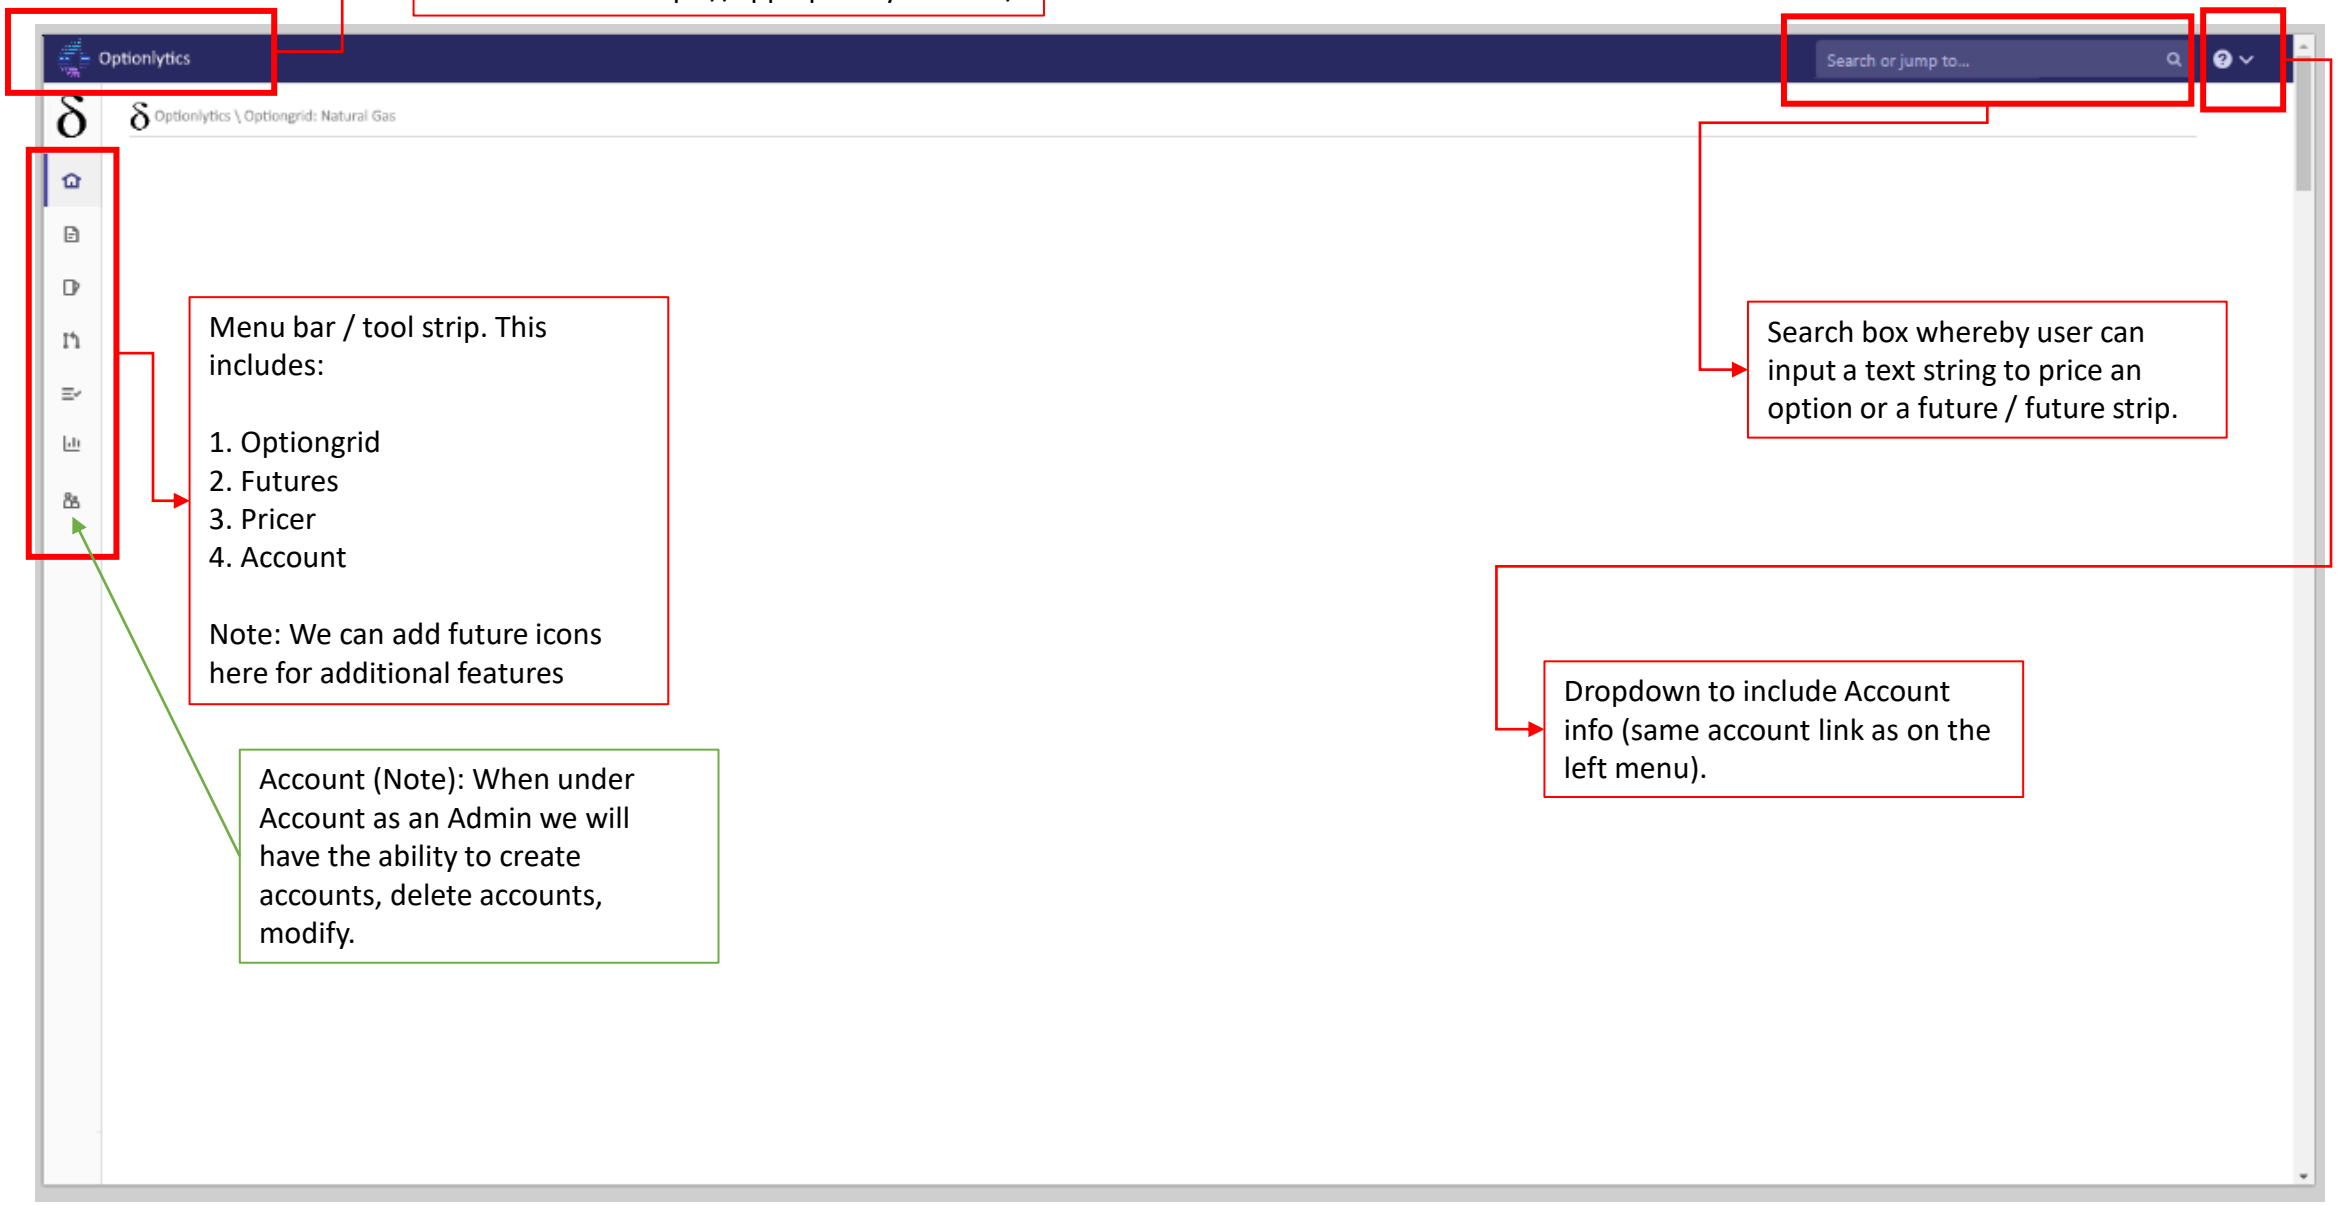
Optionlytics

# Canvas design of website



Optionlytics

Logo, goes to home page of app.
Think of this as https://app.optionlytics.com/



Menu bar / tool strip. This includes:

1. Optiongrid
2. Futures
3. Pricer
4. Account

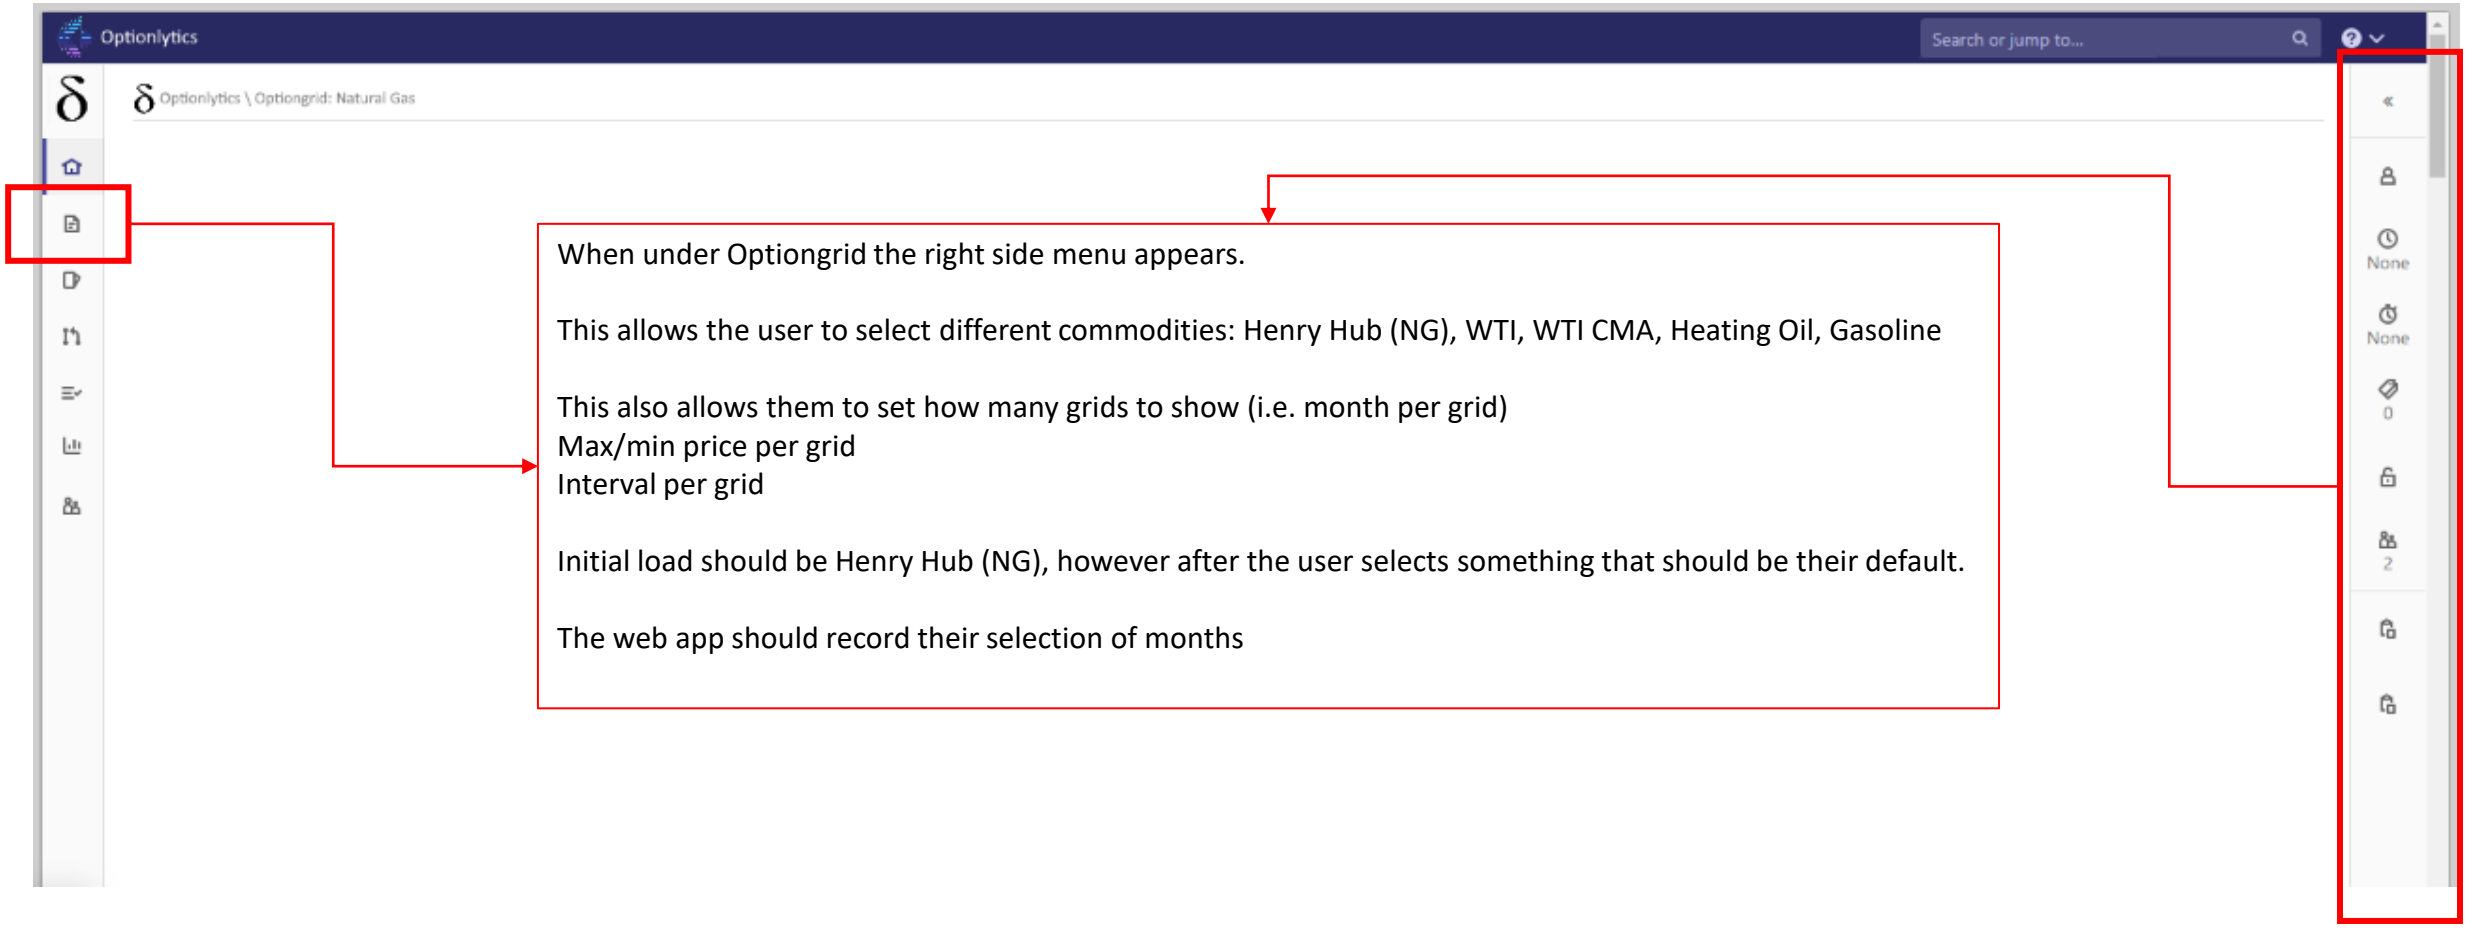
Note: We can add future icons here for additional features

Account (Note): When under Account as an Admin we will have the ability to create accounts, delete accounts, modify.

Search box whereby user can input a text string to price an option or a future / future strip.

Dropdown to include Account info (same account link as on the left menu).

# Optiongrid



When under Optiongrid the right side menu appears.

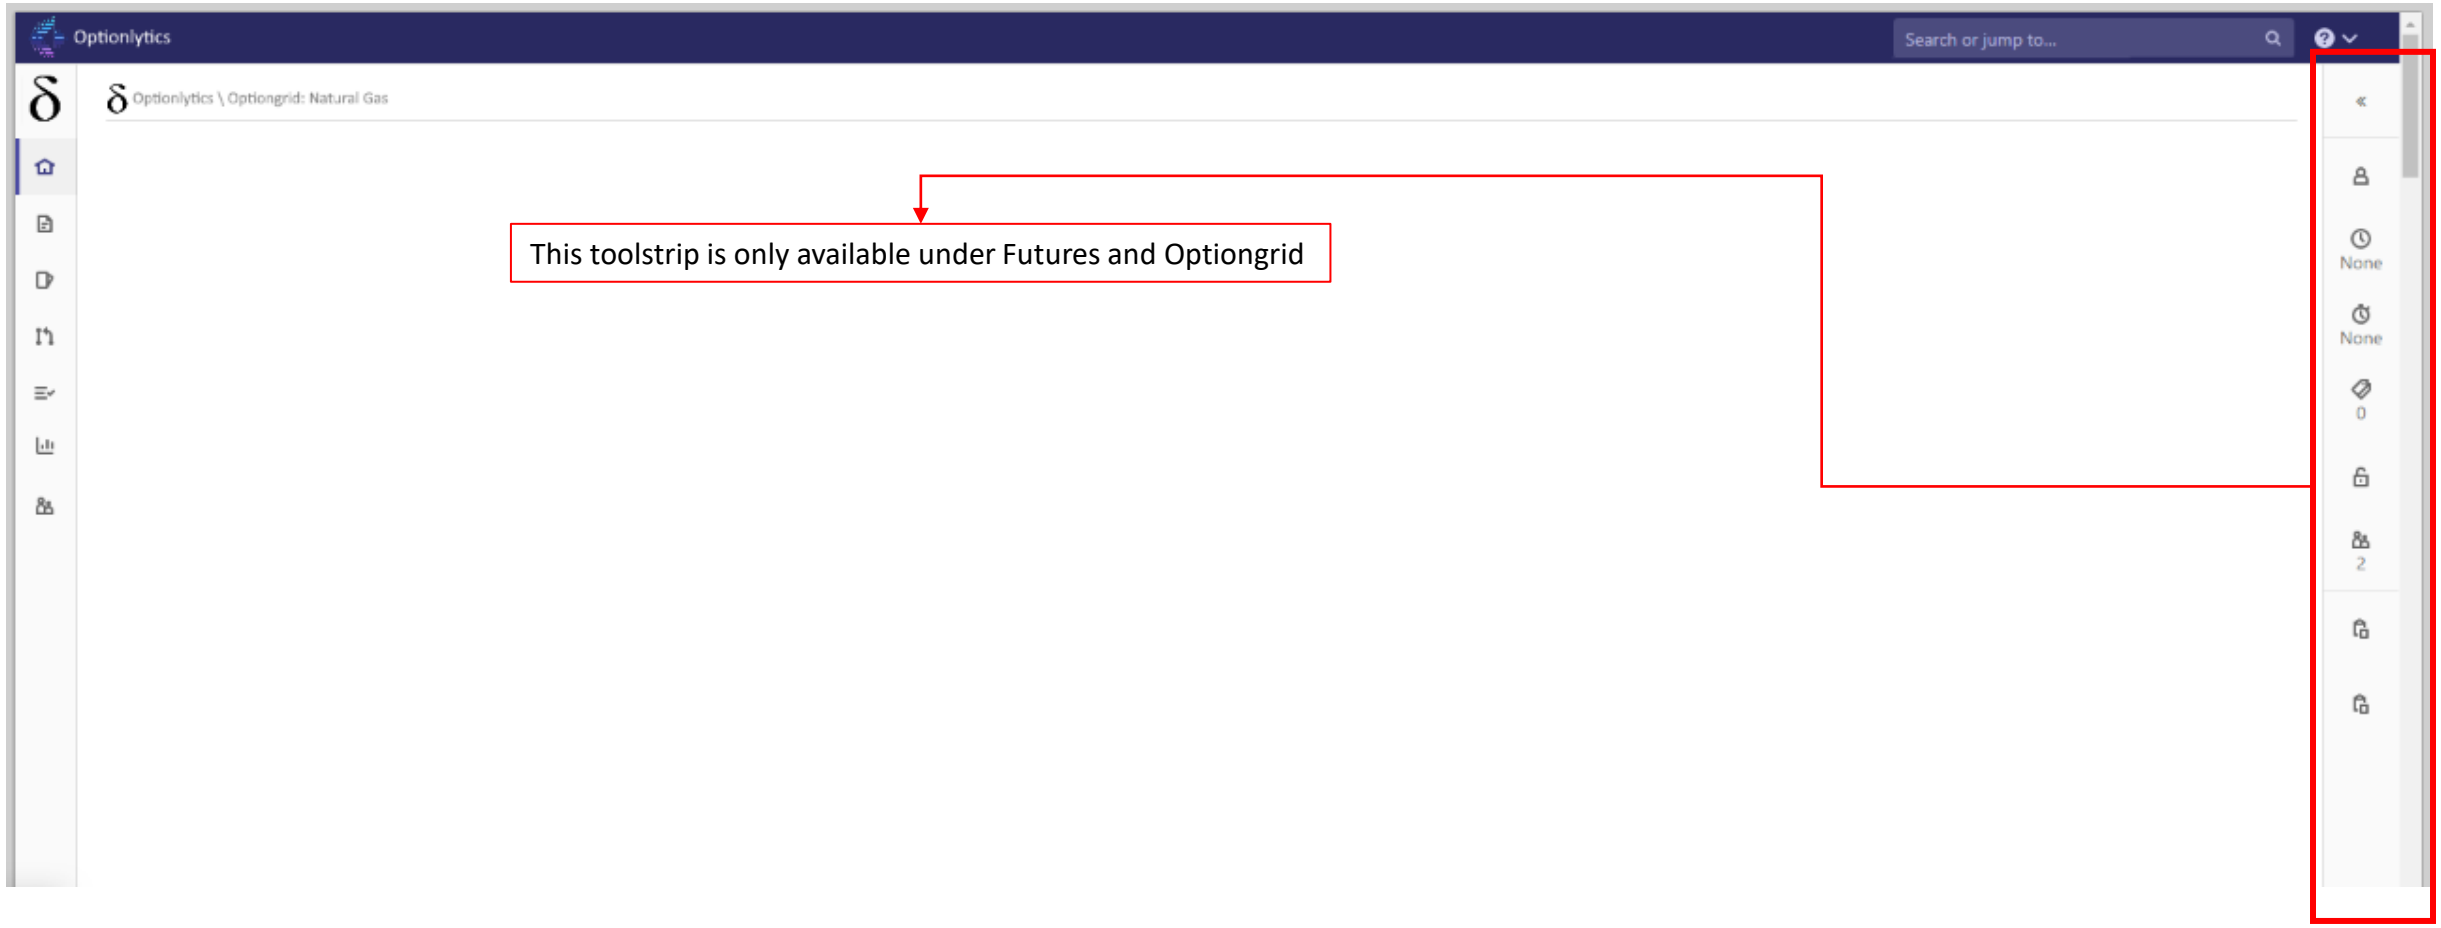
This allows the user to select different commodities: Henry Hub (NG), WTI, WTI CMA, Heating Oil, Gasoline

This also allows them to set how many grids to show (i.e. month per grid)
Max/min price per grid
Interval per grid

Initial load should be Henry Hub (NG), however after the user selects something that should be their default.

The web app should record their selection of months

# Right Toolbar



Optionlytics

# Optiongrid

Optionlytics

Search or jump to...

Optionlytics \ Optiongrid: Natural Gas

Optiongrid menu on the left allows you to add/subtract months

Grid should expand to the left right

The far left column should be locked

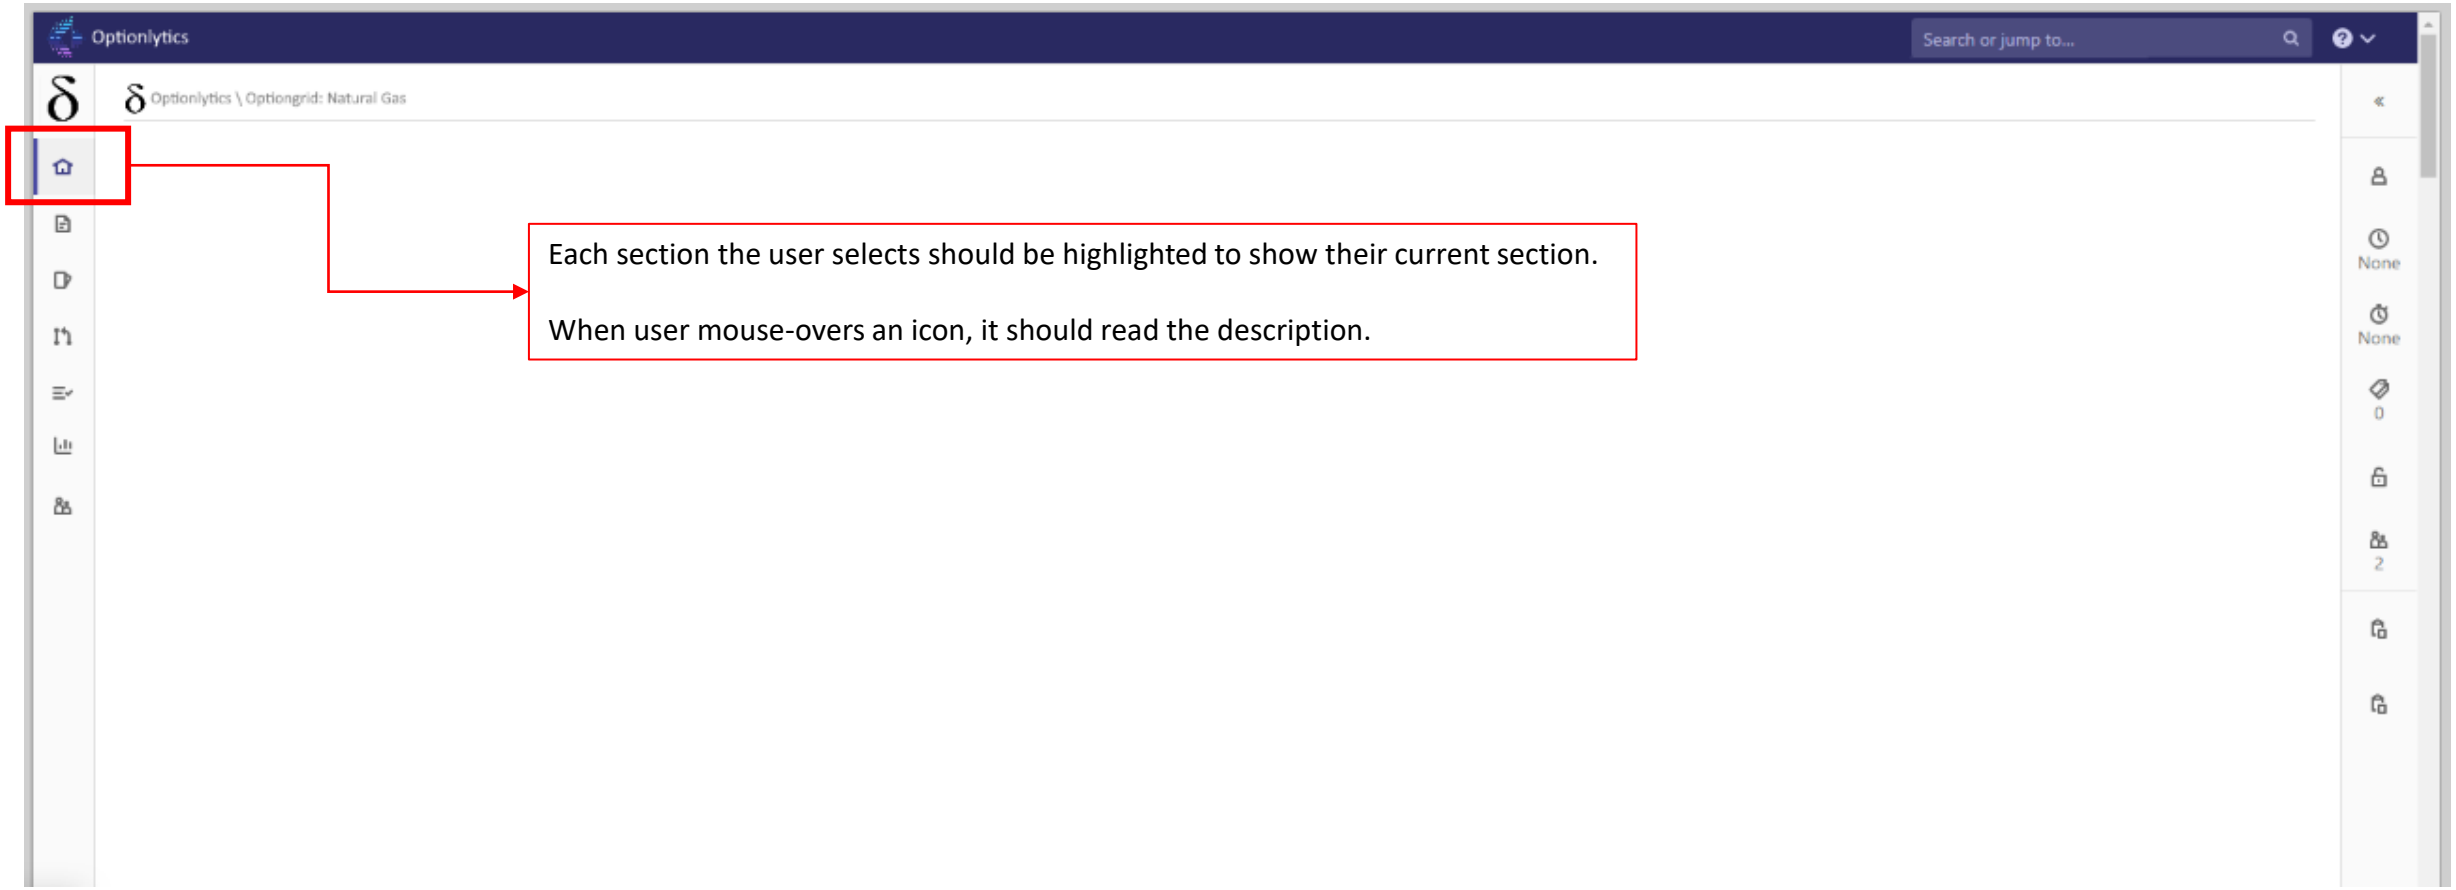
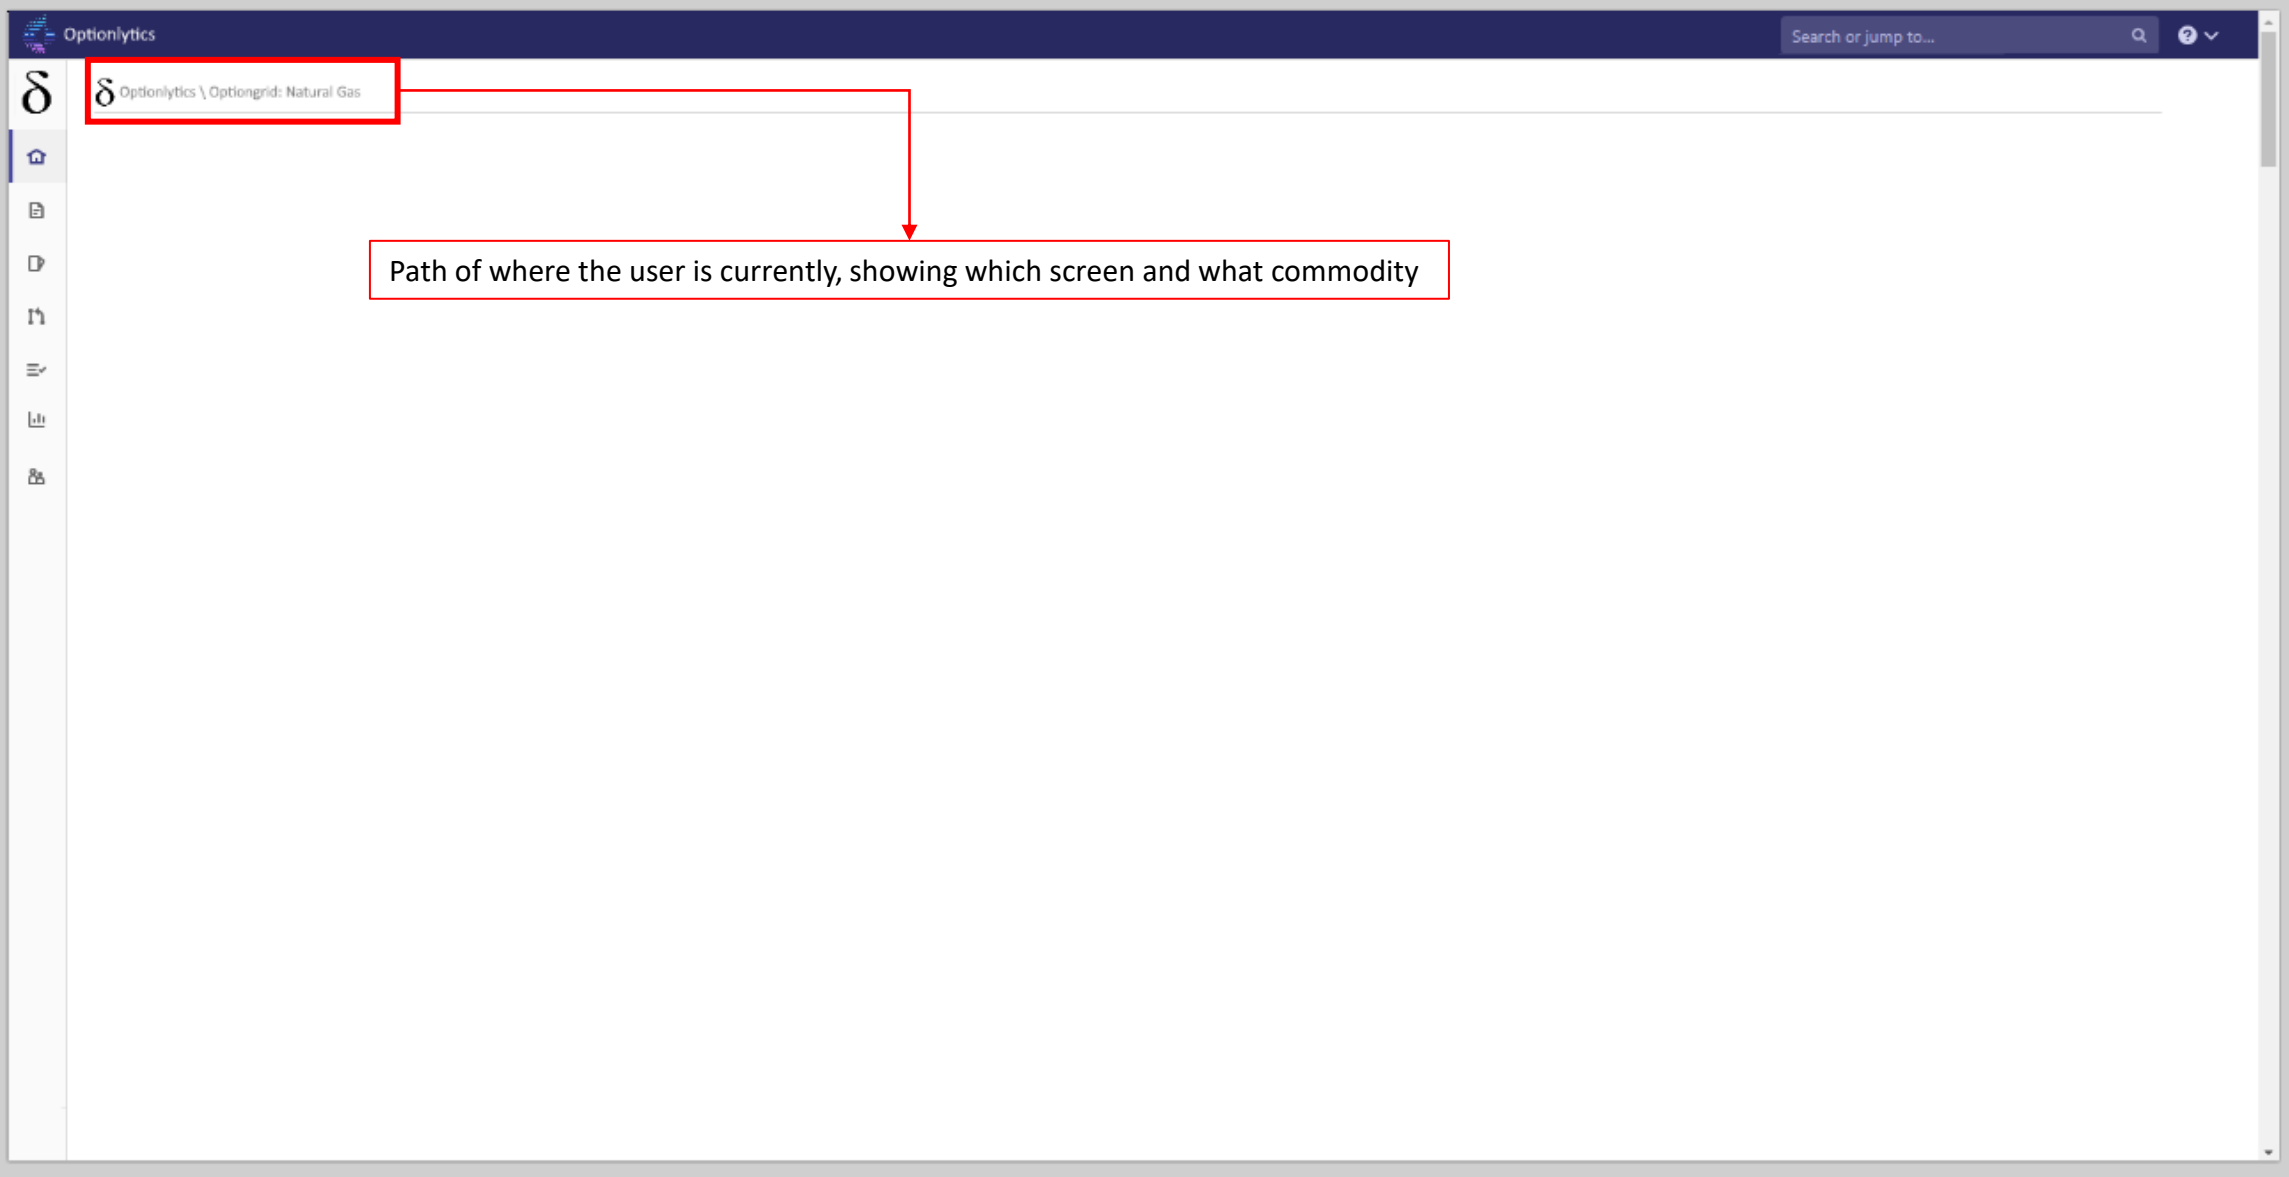
Optionlytics



Each section the user selects should be highlighted to show their current section.

When user mouse-overs an icon, it should read the description.

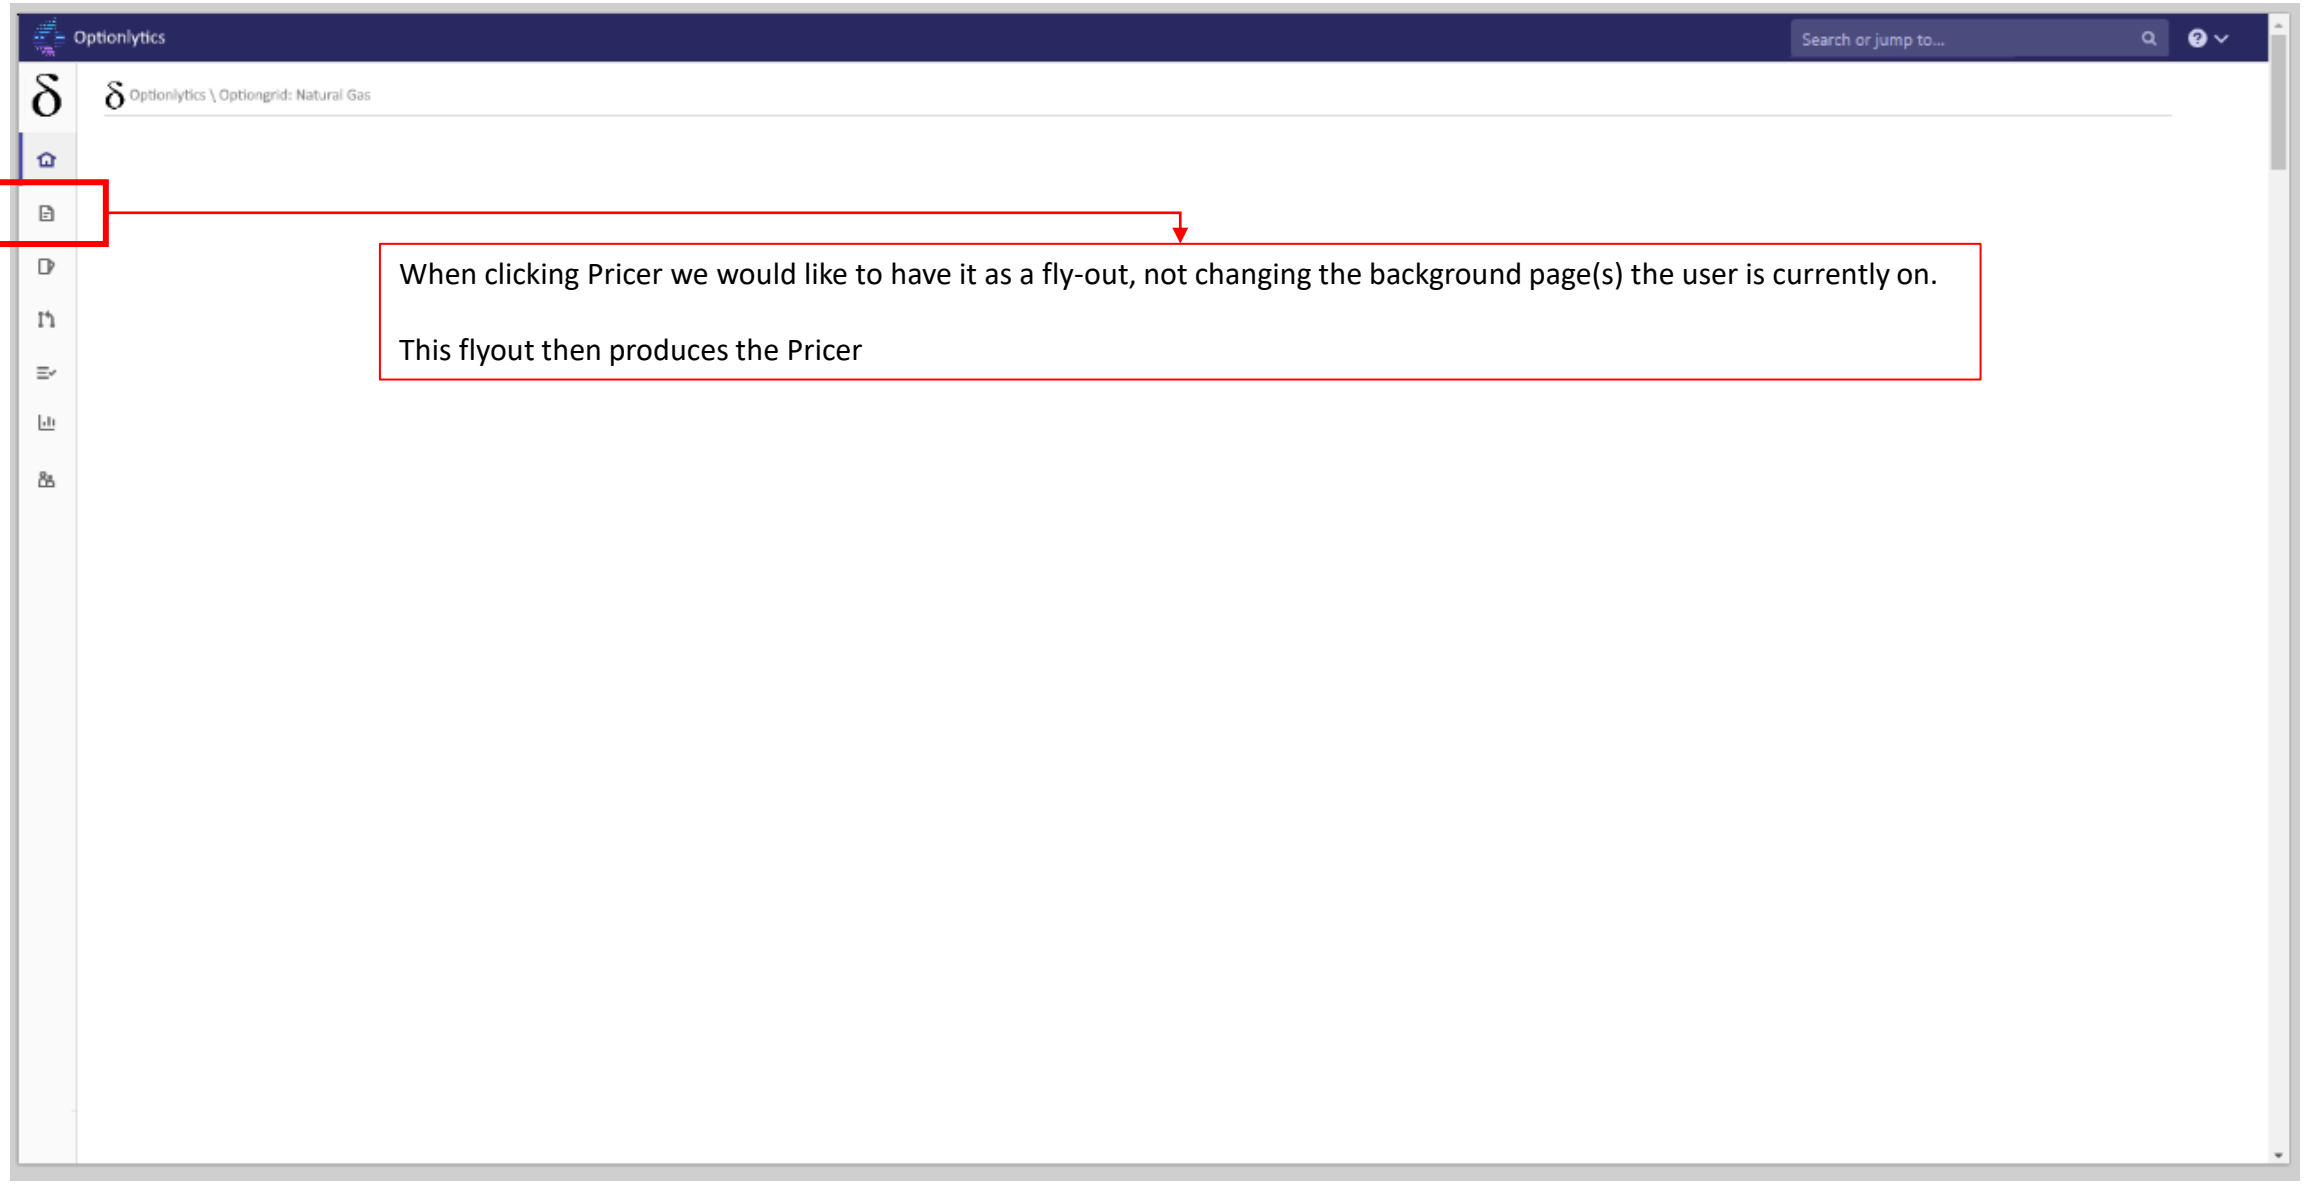
Optionlytics



Path of where the user is currently, showing which screen and what commodity

Optionlytics

# Pricer

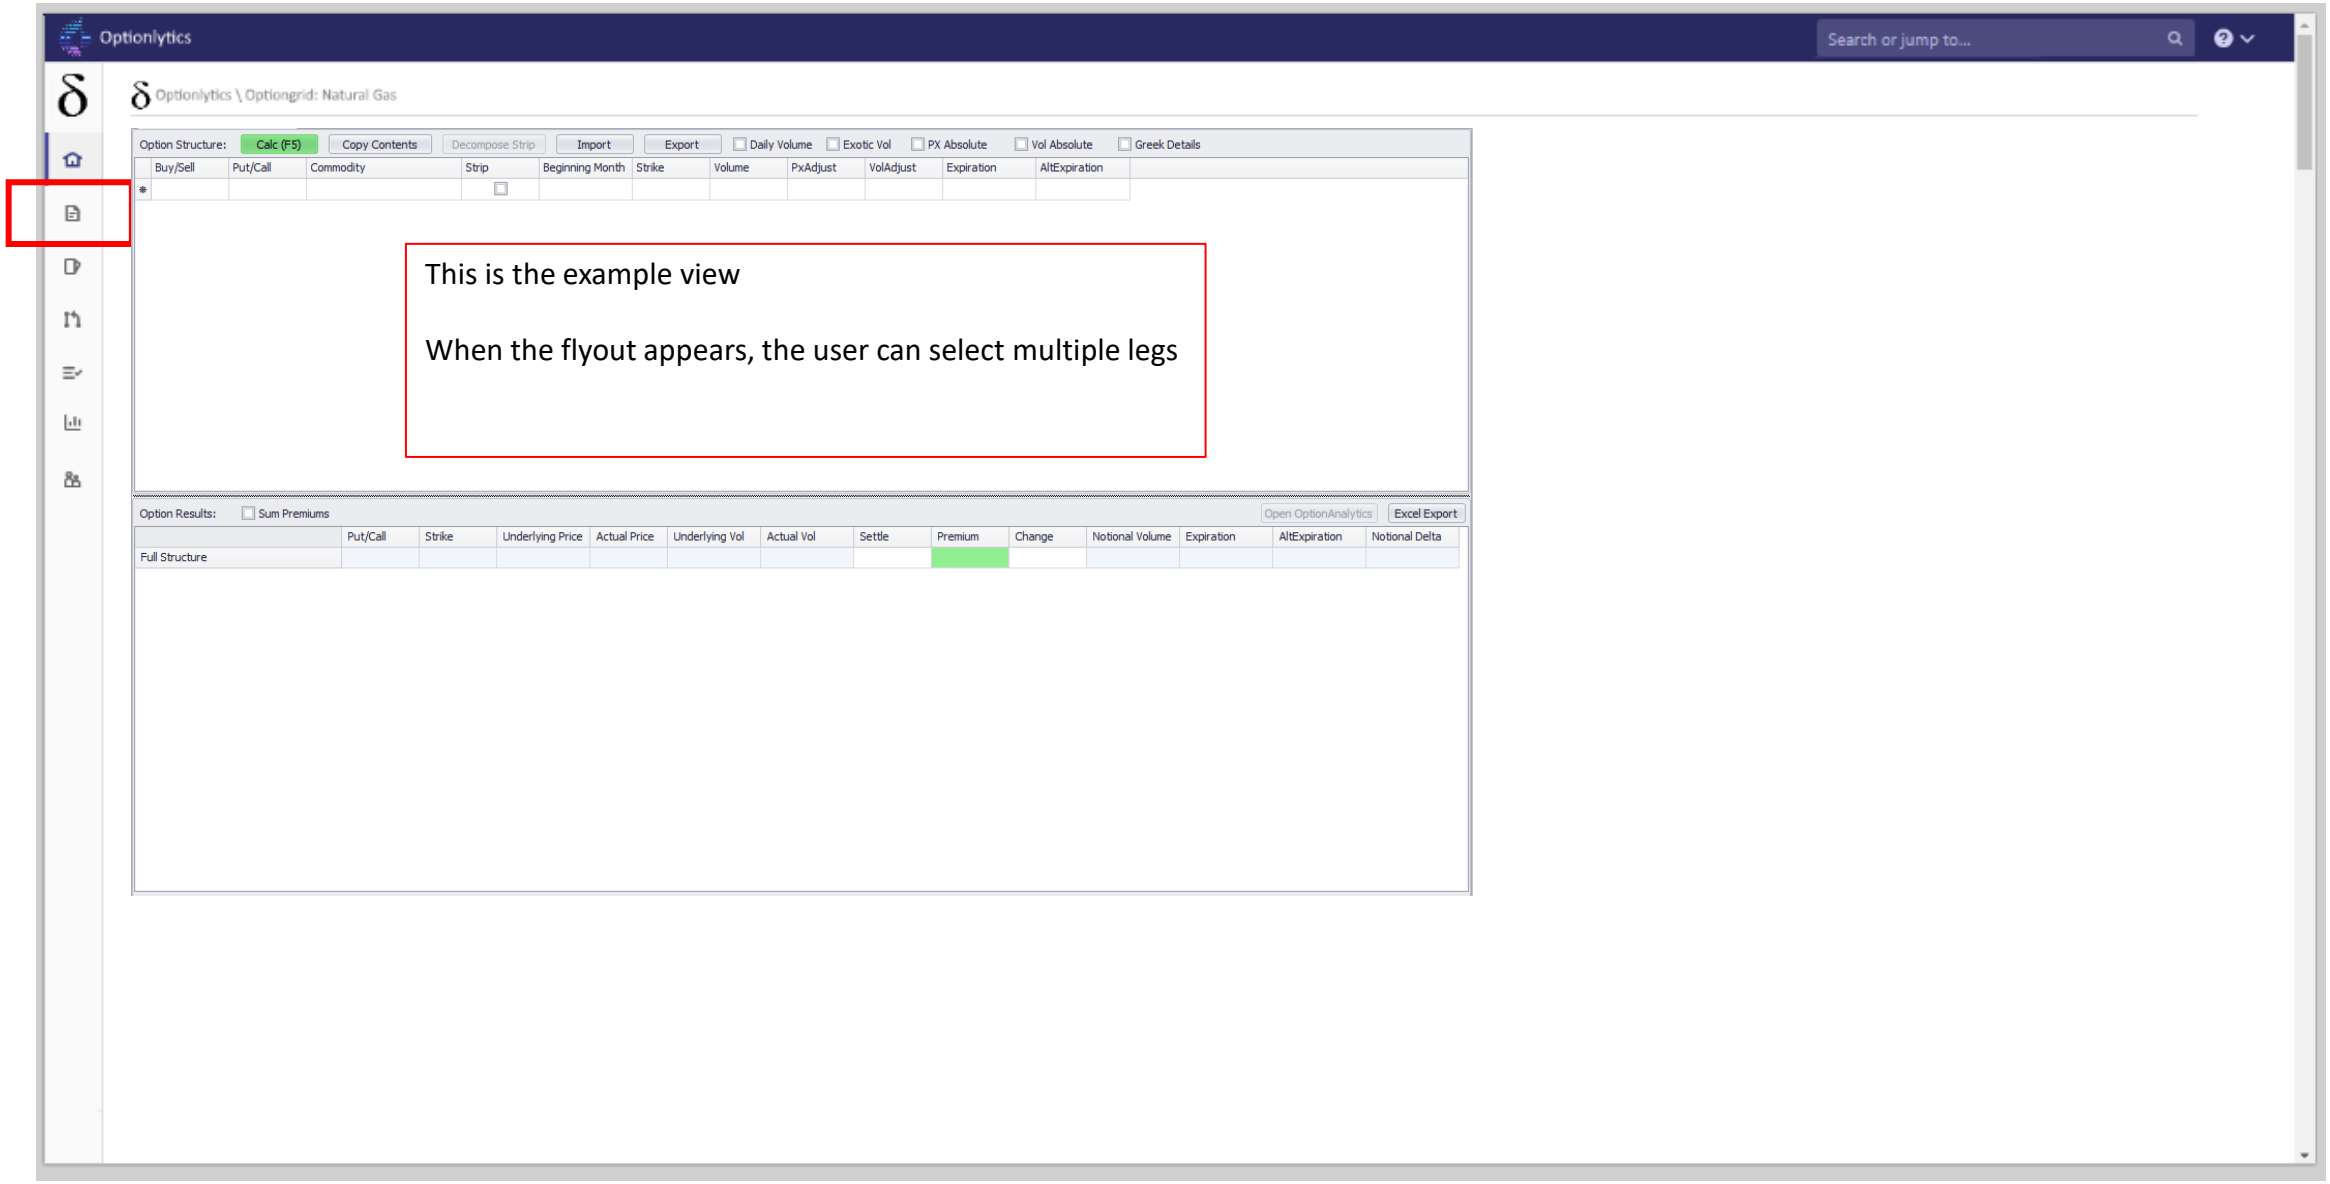


When clicking Pricer we would like to have it as a fly-out, not changing the background page(s) the user is currently on.

This flyout then produces the Pricer

Optionlytics

# Pricer



Optionlytics

# Futures Curve

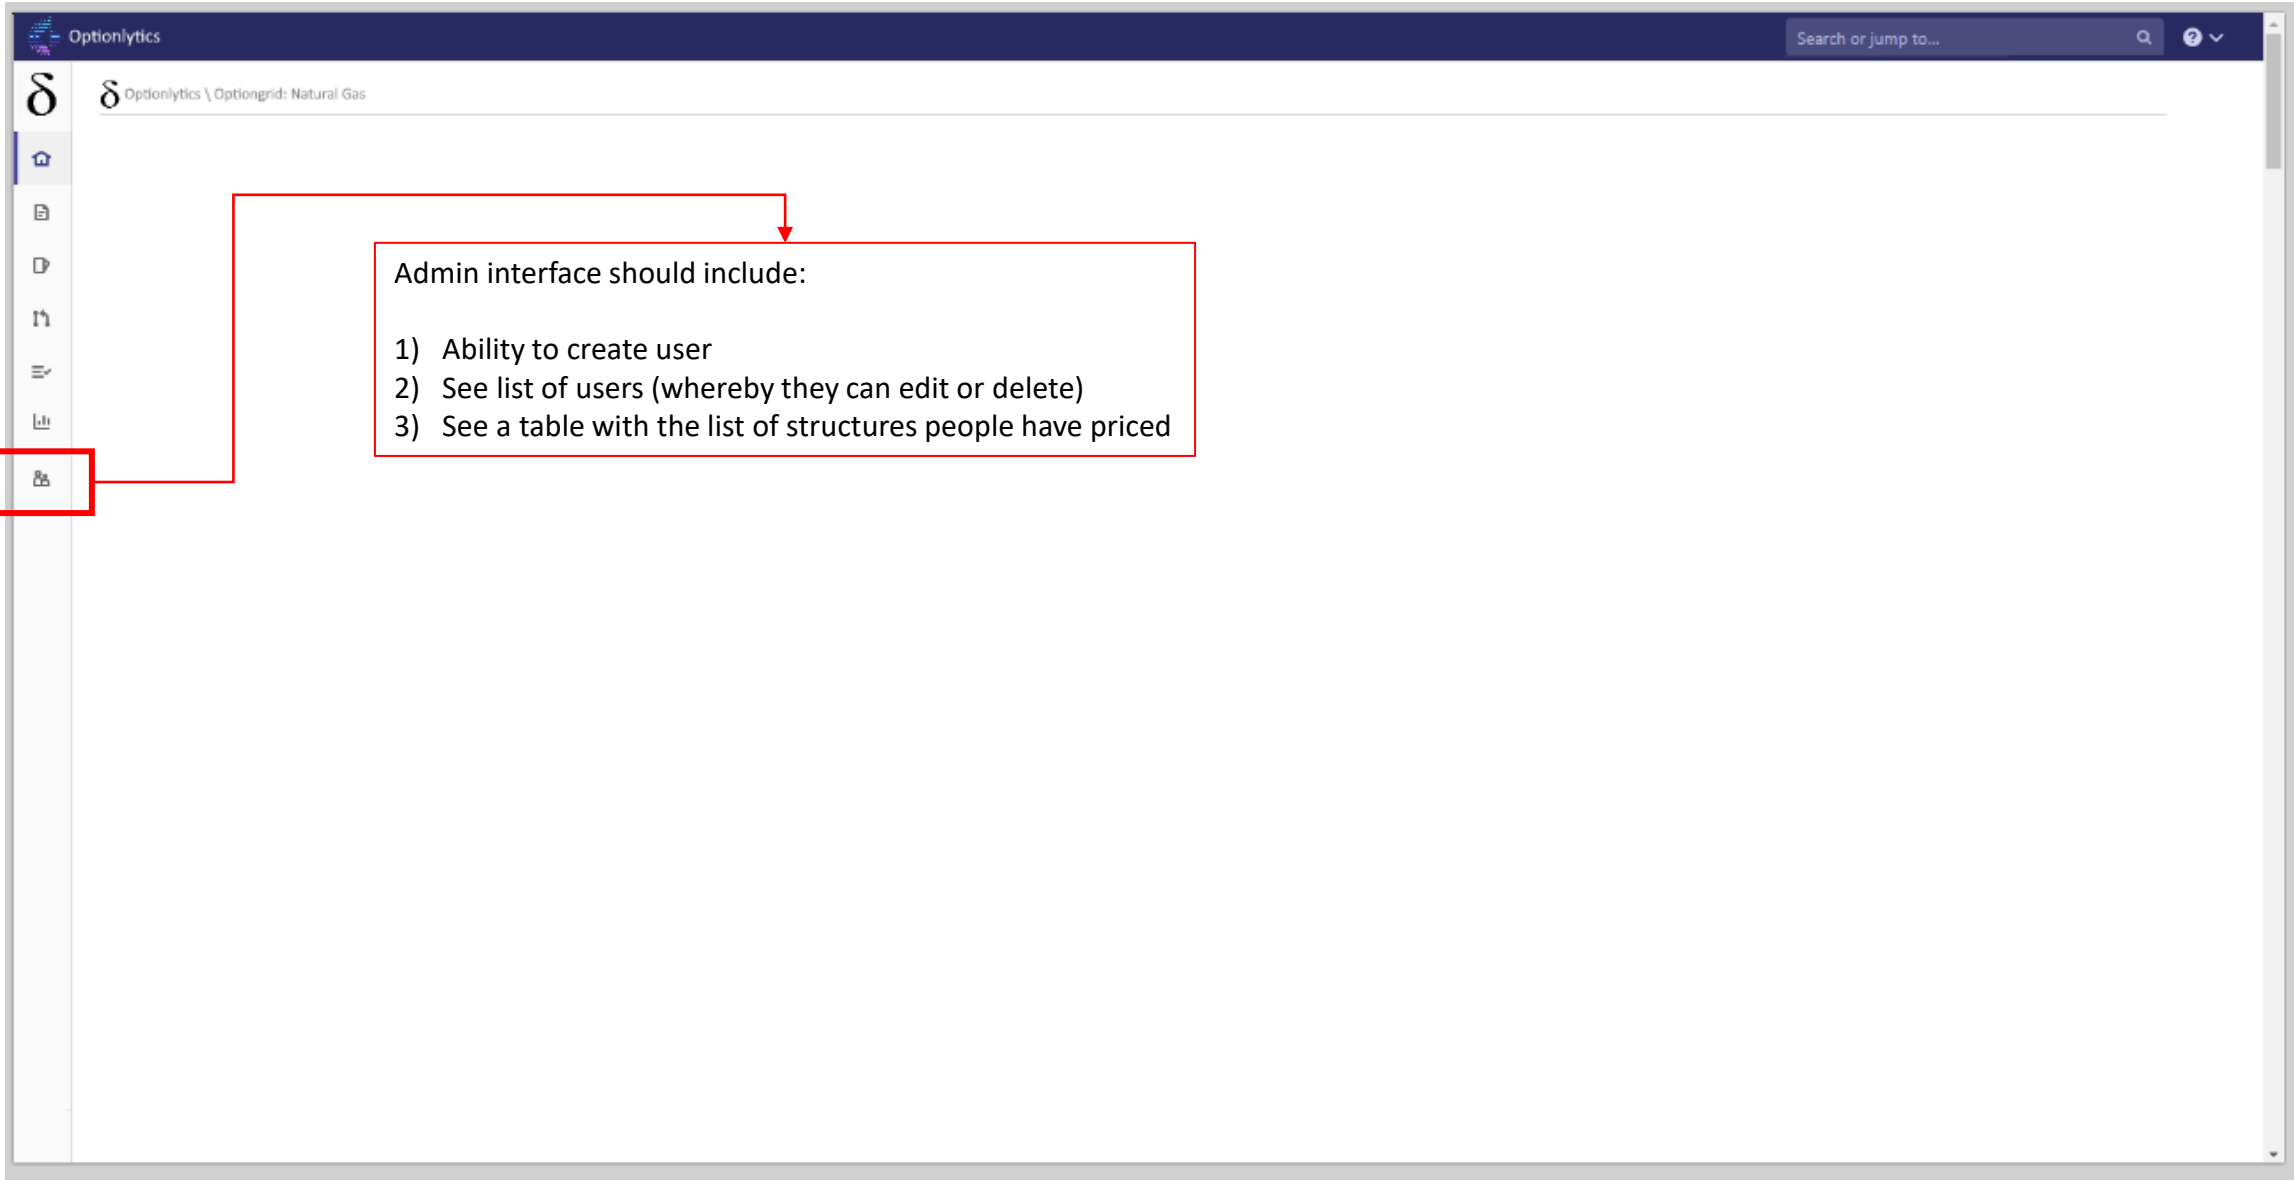
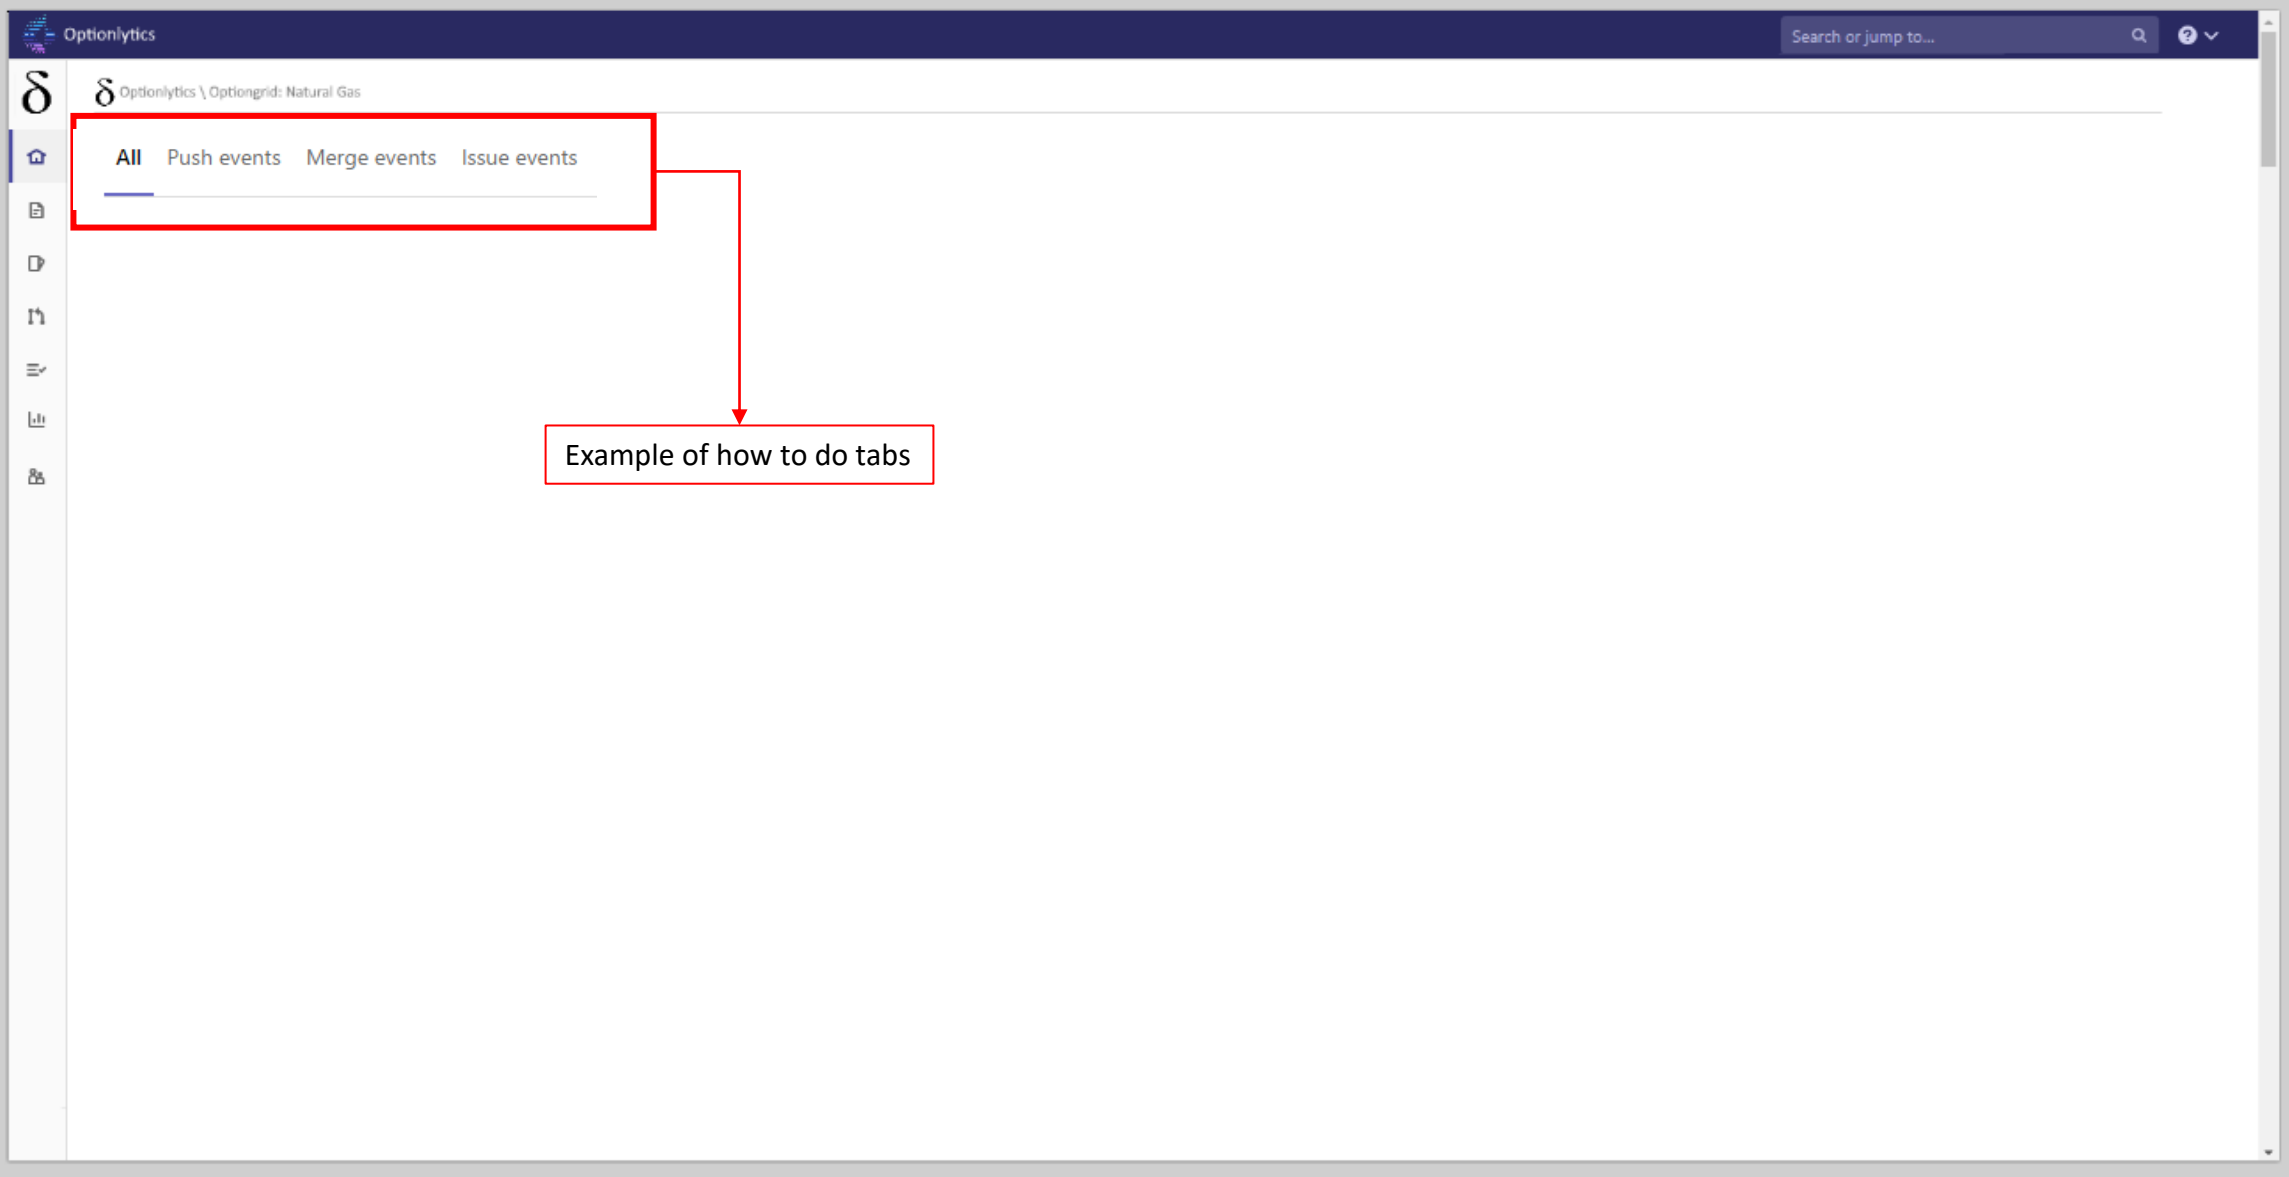
Under Futures, allow user to select what grids they want to see to include the futures curves.

Menu bar allows user to add commodity (list checkbox)

Optionlytics



Admin interface should include:

1) Ability to create user
2) See list of users (whereby they can edit or delete)
3) See a table with the list of structures people have priced


Optionlytics
